

# **CCLRC Daresbury Laboratory EPSRC Chemical Database Service Summary of Report Documents Submitted for Review at the National Services Panel Meeting 5-6 June 2006**

There are six main documents which make up the submission from the Service.

## **1. This Summary Page**

## **2. Discussions relating to awarding Grant GR/S70623/01**

This document provides a record of points which were raised by the EPSRC Appraisal Panel which met in August 2003 to discuss our proposal for the current Grant. These points were dealt with in subsequent discussions with the EPSRC. A URL to this material in electronic format was provided in the document "Renewal Issues for Grant/S70623/01" included with our Report submitted in 2005. However, we believe it may be more convenient to have this material more readily available if the Review Panel should have further discussions on these topics.

## **3. The Chemical Database Annual Report 2005/6**

This contains Annual Report material covering the year to May 2006. It also includes details of developments we propose to implement during the remainder of the current Grant.

## **4. Research Highlights**

There are seven Research Highlight articles in this section. All have been written by users who have made significant use of the Service in the course of producing internationally ranking research work.

## **5. Vision for the Future of the Service**

The document includes our view as to why a National UK Service is still required to support internationally leading research in the chemistry related area. It also includes a vision as to how such a Service might best meet user needs.

## **6. Appendix Material**

There are 8 Appendices in all. They are referenced from Sections 3&5.

**All documentation is available in electronic format from the link:**
